

Safety conditions for composite sealing with a dispersion content - liquid film

Caution: When handling liquids with a dispersion content, the following safety measures must be observed:

1. Storage and keeping

- Store in a cool, dry and well-ventilated place. Protect from frost and direct sunlight.
- Close containers tightly after use to prevent drying out or clumping
- Do not store near food or drink

2. Use

- Only work in well-ventilated areas, especially when applying to large areas
- Avoid contact with skin and eyes
- Wear suitable protective gloves and safety goggles if necessary
- Before use, ensure that the substrate is clean and dry

3. Health protection

- Skin contact: Wash affected areas thoroughly with soap and water
- Eye contact: Carefully rinse eyes with clean water. If irritation persists, consult a doctor
- Inhalation: If you feel unwell, leave the area and go into the fresh air
- Ingestion: Rinse mouth but do not induce vomiting. Seek medical advice

4. Environment

- Dispose of product residues and containers in accordance with local regulations
- Do not allow dispersal into drains, water courses or onto the ground
- Do not allow uncontrolled discharge of diluted residues

5. Fire protection

- Dispersion adhesive is normally non-flammable, but do not use near open flames or hot surfaces
- Do not heat or incinerate containers

6. Labelling

- Observe the safety and hazard information on the packaging
- May contain sensitising or allergenic substances – observe warnings according to the CLP Regulation (EC) No. 1272/2008

7. First aid

- If you feel unwell, seek medical advice and have the safety data sheet to hand
- Ensure that people in the surrounding area know about basic first aid measures
