

Safety regulations for Punic Wax

1. General Information:

Punic Wax is a wax soap made from a mixture of beeswax and sodium and potassium soaps.

It is a chemically stable product and is not generally considered to be toxic. However, basic safety precautions should be followed.

2. Hazard identification:

Health hazards: Contact with eyes may cause irritation.

Environmental hazards: Large quantities should not be allowed to enter drains or water courses, causing environmental pollution.

3. Precautions:

When handling:

Wear gloves to avoid skin contact, especially with sensitive skin.

Avoid contact with eyes; wear safety goggles when working above eye level.

Do not ingest.

When storing:

Keep in tightly closed, labelled containers.

Store in a cool, dry place out of reach of children.

Protect from direct sunlight and temperatures above 35°C.

When disposing of:

Dispose of in accordance with local regulations for chemical waste.

Do not dispose of in drains or open water courses.

4. First-aid measures:

In case of contact with skin: Wash off with soap and water. If irritation persists, seek medical attention.

In case of contact with eyes: Rinse eyes immediately with plenty of water. If irritation persists, seek medical attention.

If swallowed: Rinse mouth and drink plenty of water. If symptoms persist, seek medical attention.

If vapours are inhaled: Provide fresh air. If symptoms persist, seek medical attention.

5. Personal protective equipment (PPE):

Suitable gloves (e.g. made of nitrile).

Safety goggles when handling large quantities.

Well-ventilated work area.

6. Fire and explosion protection:

Punic wax is not flammable.

In case of fire in the area, use suitable extinguishing agents (e.g. water, foam, CO₂)
